WORK EXPERIENCE

Amdocs *(Experienced Software Developer)* **Pune, India | May 2025 – Present**

- Developed Java/Spring Boot microservices, REST APIs, and Oracle SQL solutions for enterprise Customer Relationship Management (CRM) and Order Management System (OMS), integrating BSS and OSS workflows for order processing, provisioning, activation, and service changes across B2B/B2C telecommunications services.
- Designed and developed a deployment validation application using Python, Flask, Oracle Database and Open PyXL automating database verification release tracking and Excel and email reporting.
- Worked on migration of Amdocs Service Order Manager (SOM) to Order Delivery Orchestrator (ODO), supporting OSS-driven services orchestration and enterprise fixed-line products, including EWL, IPVPN, and Cisco SD-WAN.
- Built an internal GenAI - powered engineering platform using Cursor and MCPs, integrating Kafka, databases, Jira, Bit bucket, and unix operations; developed agentic AI and RAG workflows for production-defect analysis, root cause investigation, and order remediation.

Amdocs *(Associate Software Engineer)* **Pune, India | Dec 2023 – May 2025**

- Implemented Amdocs CRM enhancements and resolved defects using Java, Spring Boot, and SQL translating defined business requirements into functional solutions within an agile development environment.
- Enhanced CRM customer notification framework to support communication triggered by order creation, updates and amendments; developed an interface feature for previewing notification template and associated product parameters.
- Automated customer notification workflows covering template conversion, Git check-ins, change package generation and deployment imports; developed utilities for Java dependency, SQL rollback generation and secure file transfer.

EDUCATION

Bachelor of Engineering in Computer Engineering **July 2019 – June 2023**

Thapar Institute of Engineering and Technology, Patiala, India CGPA 7.71/10
Elective Focus - Mathematics & Computing

PROJECTS

Shabad Shazam - *Gurbani Audio Recognition Application* *(Flutter, Dart, Python, FastAPI, PostgreSQL, Docker)*

- Developed a mobile application to identify indexed gurbani - shabad (Sikh sacred scripts and hymns) recordings from short audio samples, displaying hymn and performer information, search history and external listening links.
- Implemented an acoustic-fingerprinting pipeline using spectral analysis, peak-pair hashing, and time aligned PostgreSQL matching, with CSV-based audio ingestion and Docker compose setup.

Neuro Data Lab – *EEG Based Game Control* *(Capstone Project II - Python, PyQt, scikit-learn, EMOTIV EPOC X)*

- Collaborated on collecting labeled, 14-channel EEG data from multiple participants viewing forward and backward movement cues in a first person simulation.
- Developed a PyQt toolbox for data preparation, Independent Component Analysis, and evaluation of five classifies, achieving 95.45% accuracy with Extra trees.

Drive Safe - *Driver Drowsiness Detection & Safety Control* *(Capstone Project I - Python, OpenCV, Arduino, Tinkercad)*

- Developed a real-time driver drowsiness detection, monitoring prototype using Python, OpenCV and dlib to detect prolonged eye closure, yawing, dozing and indicators of driver distraction from driving using a web camera.
- Implemented 68-point facial landmark analysis with normalized eye opening and mouth opening ratios; developed an Arduino based vehicle prototype, incorporating staged deceleration to demonstrate obstacle aware safety responses.

Med-e-CARE - *Online Pharmacy Management System* *(UCS503 Academic Project - SQL, UML, Software Engineering)*

- Developed an end-to-end pharmacy management web application supporting customer registration, medicine ordering, order history, inventory management, and sales tracking during the covid-19 pandemic.
- Developed a dedicated NGO ordering workflow with expiry based medicine availability and translated application requirements into UML models and a SQL database design covering inventory and orders

SKILLS

- **Programming & Scripting:** Java, Python, SQL, JavaScript, Shell Scripting
- **Application Development:** Spring Boot, Flask, React, Flutter, REST APIs, Microservices

- **Development Tools & Cloud Platforms:** Git, Docker, Jenkins, Microsoft Azure, Linux/Unix, CI/CD, OAuth 2.0
- **Machine Learning & Computer Vision:** PyTorch, scikit-learn, NumPy, OpenCV, dlib
- **Databases:** Oracle Database, MySQL, PostgreSQL
- **Spoken Languages:** English, Punjabi, Hindi

KEY ACCOMPLISHMENTS & CERTIFICATIONS

- **Ownership & Excellence Recognition** - Amdocs | Feb 2026
  Recognized for strong ownership, customer collaboration and technical contributions to high quality CRM releases; additionally earned the Agentic SDLC Foundation and AGS Agentic badges, demonstrating proficiency in AI-driven software development practices.
- **Special Recognition** - Amdocs | Jan 2025, Aug 2026
  Awarded special bonuses on two occasions beyond regular entitlements, recognizing outstanding contributions, sustained commitment and dedication to work.
- **Promotion to Experienced Software Developer** - Amdocs | June 2025
  Earned promotion in recognition of technical growth and performance, progressing to an experienced engineering role with broader delivery responsibilities.
- **Secure Software Development & Gen-AI Security** - Udemy, Amdocs | May-July 2026
  Completed four courses covering secure coding principles, secure application development, web application security and securing generative AI systems.
- **Academic Excellence in Capstone Projects** - Thapar Institute of Engineering & Technology | 2022-2023
  Earned 'A' grades (10/10 grade points) in both Capstone Project I & II, each carrying 8 academic credits demonstrating consistent performance across two substantial engineering projects.
- **Innovate India Coding Championship** | July 2022
  Ranked among the top 5% of approximately 100K participants in Round 1, demonstrating competitive programming and analytical problem solving ability
- **Software Engineering Virtual Programs** - J.P. Morgan & Goldman Sachs, Forage | April-June 2022
  Completed practical simulations covering stock price data integration, financial data visualization and password security analysis.
- **Built a Face Recognition Application using Python** - GUVI | April 2021
- **65th Regional Abacus Competition** – Brain-O-Brain | 2015
  Won the Champions Trophy in Ludhiana, Punjab demonstrating mental arithmetic skills.

EXTRACURRICULAR ACTIVITIES

- **Agentic AI - Knowledge Sharing Session** - Amdocs
  Conducted sessions on Amdocs CRM - OMS workflows, agentic development covering Model Context Protocol (MCP), efficient token utilization, security considerations and encryption for rules, personas and development guides.
- **Event Management Head** - VIRSA, Thapar Institute of Engineering & Technology
  Organized cultural festivals and talks for 5000+ students, coordinating a budget event and supervising a team of 70.
- **Public Relations Head** - OWASP Student Chapter, Thapar Institute of Engineering & Technology
  Coordination hackathons, guest lectures and webinars for 800+ students, supporting publicity and sponsorship outreach involving organizations like IBM, Reskill and Coding minutes
- **Experiential Learning Centre Activities** - Thapar Institute of Engineering & Technology
  Completed and submitted projects across Robotic Arm using Arduino, Cyber Security & Internet Security, Mobile App Development, and Gaming & Animation.
- **Model United Nations Delegate** - Thapar Institute of Engineering & Technology
  Represented positions in United Nations committees and the All India Political Parties Meet through policy research and debate.
- **Student Outreach** - Internshala & Tutedude Campus Brand Ambassador
  Organized online talks and webinars promoting student development programs and supported outreach and market research through e-learning platform reviews and user feedback.
- **CSR & Community Volunteer** - Ludhiana, India
  Contributed to community service activities and helped organize food distribution and pandemic relief camps.
- **School Leadership & Arts** - D.A.V. Public School, Ludhiana
  Lead Dr. C.V Raman house in academic, cultural and sports events; earned second place with a team in a state level bhangra competition.
