

JAGJEEVAN SINGH SONI

Jeevansoni3618@gmail.com | LinkedIn | GitHub

Software developer with enterprise telecom experience, demonstrating progressive responsibility, ownership and a structured approach to problem solving. Brings a methodical working style, accountability for delivery and experience collaborating across technical and business teams. Committed to advancing expertise through graduate study, connecting academic knowledge with practical experience to strengthen technical judgment and address complex engineering challenges.

WORK EXPERIENCE

Amdocs (Software Developer)

Pune, India | May 2025 – Present

- Developed and enhanced enterprise Customer Relationship Management (CRM) and Order Management System (OMS) capabilities using Java, Spring Boot, REST APIs and Oracle SQL supporting B2B telecommunications order processing and service delivery.
- Collaborated across CRM, OMS, provisioning and billing teams to deliver integrated business workflows, working with order orchestration, Master Enterprise Catalog (MEC) and Kenan billing integration.
- Owned delivery of business critical CRM enhancements from requirement analysis and solution development through testing, production deployment and issue resolution, coordinating technical dependencies and changing business requirements.
- Designed and developed a deployment validation application using Python, Flask, Oracle Database and OpenPyXL automating database verification release tracking and Excel and email reporting across testing, pre-production and production environments.
- Delivered application script migration from legacy 32-bit Linux infrastructure to a 64-bit environment, coordinating integration validation, production cutover and post deployment monitoring.
- Supported recurring releases through Git, Jenkins and CI/CD workflows, resolved production and regression defects under an agentic SDLC environment.

Amdocs (Associate Software Engineer)

Pune, India | Dec 2023 – May 2025

- Completed structured Amdocs CRM and OMS product training, developing an understanding telecom Business Support Systems, customer and account management, order lifecycles, and the business workflows connecting service fulfillment and billing.
- Implemented application enhancements and resolved defects using Java, Spring Boot, SQL translating defined business requirements into functionality within an Agile development environment.
- Enhanced a CRM customer notification framework to support communication triggered by order creation, updated and amendments; developed an interface feature for previewing notification template and associated product parameters.
- Automated template conversion, Git check-ins, change package generation and deployment imports standardizing notification release workflows and reducing repetitive preparation.
- Developed and adapted utilities for Java dependency analysis, SQL rollback generation and secure file transfer while contributing to root cause investigations and retrospectives.

EDUCATION

Bachelor of Engineering in Computer Engineering

July 2019 - June 2023

Thapar Institute of Engineering and Technology, Patiala, India

CGPA 7.71/10

Elective Focus: Mathematics and Computing

UG Coursework

- Data Structures and Algorithms (UCS301, UCS415)
- Operating Systems (UCS303)
- Software Engineering (UCS503)
- Probability and Statistics (UCS410)
- Practical Computing (UCS311)
- Social Network Analysis (UCS813)
- Artificial Intelligence (UCS411)
- Database Management System (UCS310)
- Ethical Hacking (UCS806)
- Mathematics and Computing - **Mathematic Modelling and Simulation (UMC512), Financial Mathematics (UMC632), Matrix Computation (UMC622), Computational Number Theory (UMC742)**
- Computer Graphics (UCS505)
- Computer Networks (UCS414)
- Machine Learning (UML501)

SKILLS

Programming & Scripting: Java, Python, SQL, JavaScript, Shell Scripting

Application Development: Spring Boot, Flask, React, Flutter, REST APIs, Microservices

Development Tools & Cloud Platforms: Git, Docker, Jenkins, Microsoft Azure, Linux/Unix

Software Engineering & Security: CI/CD, Agile, JWT, OAuth 2.0, Agentic SDLC, Release Automation

Machine Learning & Computer Vision: PyTorch, scikit-learn, NumPy, OpenCV, dlib

Databases: MySQL, PostgreSQL

Spoken Languages: English, Punjabi, Hindi

PROJECTS

Shabad Shazam - Gurbani Audio Recognition Application

Personal Project | Flutter, Dart, Python, FastAPI, PostgreSQL, Docker

- Developed a mobile application to identify indexed gurbani - shabad (Sikh sacred scripts and hymns) recordings from short audio samples and retrieve the corresponding hymn and performer information.
- Implemented an acoustic-fingerprinting pipeline using spectral analysis, peak-pair hashing, and time aligned matching against an indexed PostgreSQL catalog.
- Connected a flutter interface to FastAPI recognition services, supporting microphone capture, recognition results, local search history, and external listening links like YouTube, Spotify.
- Built a csv-driven audio ingestion workflow to generate fingerprints and maintain recording metadata, and configured a Docker compose environment for the backend and database.

Neuro Data Lab – EEG-Based Movement Classification for Game Control

Capstone Project II - Python, PyQt, scikit-learn, EMOTIV EPOC X

- Collaborated on a brain computer interface project investigating EEG-based game control through the classification of brain signals recorded during forward and backward movement visualizations.
- Collected 14-channel EEG recordings from multiple participants viewing a first person graphical simulation, using timed directional cues to construct labeled datasets for movement classification.
- Developed a PyQt toolbox supporting EEG data preparation, Independent Component Analysis and the training and evaluation of five machine learning classifiers.
- Achieved 95.45% accuracy with the Extra Trees classifier in the project's offline evaluation, establishing a foundation for translating classified EEG signals into game-control commands

Drive Safe – Vision based Driver Drowsiness Detection and Safety Control

Capstone Project I – Python, OpenCV, dlib, Arduino, Tinkercad

- Developed a real-time driver drowsiness detection, monitoring prototype using Python, OpenCV and dlib to detect prolonged eye closure, yawing, dozing and indicators of driver distraction from driving using a web camera.
- Implemented 68-point facial landmark analysis with normalized eye opening and mouth opening ratios incorporating image enhancement to support detection under varying lightning conditions.
- Designed time based detection logic and escalating visual and audible alerts to distinguish sustained signs of drowsiness from brief facial movement.
- Developed and tested an Arduino based vehicle control prototype, incorporating four ultrasonic sensors, motor control and staged deceleration to demonstrate obstacle aware safety responses.

Med-e-CARE – Online Pharmacy Management System

(UCS503 – Academic Project) SQL, UML, Rational Software, Software Engineering

- Developed an end-to-end pharmacy management web application using HTML, Python and SQL integrating the website interface with backend logic and a relational database to support online medicine ordering during the covid-19 pandemic.
- Implemented customer facing workflows for registration, login, account management, medicine selection, order placement and order history alongside administrative capabilities for inventory updated and sales tracking.
- Developed a dedicated NGO ordering workflow with expiry based medicine availability and translated application requirements into UML models and a SQL database design covering inventory and orders

CERTIFICATIONS & KEY ACCOMPLISHMENTS

- **Ownership & Excellence Recognition** - Amdocs | Feb 2026
Recognized for dependable ownership, strong customer relationships and technical contributions that supported high quality CRM releases.
- **Special Recognition Bonuses** - Amdocs | Jan 2025, Aug 2026
Awarded special bonuses on two occasions in addition to annual bonuses, recognizing outstanding contributions, sustained commitment and dedication to work.
- **Promotion to Software Developer, Experienced Level** - Amdocs | June 2025
Earned promotion in recognition of technical growth and performance, progressing to an experienced engineering role with broader delivery responsibilities.
- **Secure Software Development & GenAI Security** - Udemy, Amdocs | May-July 2026
Completed four courses covering secure coding principles, secure application development, web application security and securing generative AI systems.
- **Academic Excellence in Capstone Projects** - Thapar Institute of Engineering & Technology | 2022-2023
Earned 'A' grades (10/10 grade points) in both Capstone Project I & II, each carrying 8 academic credits demonstrating consistent performance across two substantial engineering projects.
- **Innovate India Coding Championship** | July 2022
Ranked among the top 5 % of approximately 100K participants in Round1, demonstrating competitive programming and analytical problem solving ability
- **Software Engineering and Engineering Virtual Programs** - J.P. Morgan & Goldman Sachs, Forage | April-June 2022
Completed practical simulations covering stock price data integration, financial data visualization and password security analysis.
- **Build a Face Recognition Application using Python** - GUVI | April 2021
- **65th Regional Abacus Competition** | 2015
Won the Champions Trophy in Ludhiana, Punjab demonstrating numerical proficiency and mental arithmetic skills.

EXTRACURRICULAR ACTIVITIES

- **Agentic AI Knowledge Sharing Session** - Amdocs
Conducted a session on applying agentic AI in daily development workflows covering Model Context Protocol (MCP), efficient token utilization, security considerations and encryption for rules, personas and development guides.
- **Event Management Head** - VIRSA, Thapar Institute of Engineering & Technology
Organized cultural festivals and talks for 5000+ students, coordinating a budget event and supervising a team of 70.
- **Public Relations Head** - OWASP Student Chapter
Coordination hackathons, guest lectures and webinars for 800+ students, supporting publicity and sponsorship outreach involving organizations like IBM, Reskill and Coding minutes
- **Experiential Learning Centre Activities** - Thapar Institute of Engineering & Technology
Completed and submitted projects across Robotic Arm using Arduino, Cyber Security & Internet Security, Mobile App Development, and Gaming & Animation.
- **Model United Nations Delegate** - Thapar Institute of Engineering & Technology
Participated in collegiate Model United Nations conferences, representing positions in United Nations committees and the All India Political Parties Meet through research and debate.
- **Student Outreach** - Internshala & Tutedude Brand Ambassador
Organized online talks and webinars promoting student development programs and supported outreach and market research through e-learning platform reviews and user feedback.
- **CSR & Community Volunteer**
Contributed to community service activities and helped organize food distribution and pandemic relief camps.
- **House Captain** - DAV Public School, Ludhiana
Lead Dr. C.V Raman house in academic, cultural and sports events while fostering teamwork and leadership skills.
- **State Level Bhangra Competition** - DAV Public School, Ludhiana
Secured second position as a part of team in a state level folk dance competition during high school.
