

JAGJEEVAN SINGH SONI

Software Developer | Pune, India

jeevansoni3618@gmail.com | LinkedIn | GitHub | Portfolio

At Amdocs, I work on enterprise telecom systems, from CRM and order management to release automation and production support. My projects extend that engineering practice into audio recognition, computer vision, and brain-computer interfaces.

EXPERIENCE

Amdocs | Software Developer

December 2023 - Present | Previously Associate Software Engineer

Enterprise telecom systems

Develop and enhance B2B CRM and order-management capabilities using Java, Spring Boot, REST APIs, and Oracle SQL. Collaborate across order orchestration, provisioning, product catalog, and billing integration.

Delivery & production ownership

Own CRM enhancements from requirements and development through testing, deployment, and issue resolution. Support recurring releases, investigate defects, and coordinate dependencies across technical and business teams.

Automation & modernization

Built a Python and Flask deployment-validation application for database checks, release tracking, and Excel and email reporting. Migrated application scripts from 32-bit to 64-bit Linux and supported integration validation and production cutover.

Developer tooling & notifications

Enhanced order-triggered customer notifications and template previews. Automated template conversion, Git check-ins, release packaging, and deployment imports; developed and adapted Java dependency-analysis, SQL rollback, and secure file-transfer utilities.

EDUCATION

Bachelor of Engineering in Computer Engineering

Thapar Institute of Engineering and Technology

July 2019 - June 2023 | 7.71 / 10 CGPA

Elective focus: Mathematics and Computing

Relevant coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Software Engineering, Computer Networks, Machine Learning, Probability & Statistics.

RECOGNITION & LEADERSHIP

Ownership & Excellence | Amdocs

Recognized for dependable ownership, customer relationships, and technical contributions to CRM release delivery.

Special Recognition | Amdocs | January 2025 & August 2026

Recognized on two occasions for contributions, sustained commitment, and dedication to work.

Event Management Head, VIRSA; Public Relations Head, OWASP Student Chapter. Supported cultural events, technical programming, sponsorship outreach, and student teams.

PROJECTS & TECHNICAL SKILLS

Shabad Shazam | Audio recognition

Flutter | Dart | Python | FastAPI | PostgreSQL | Docker

Recognizing indexed Gurbani recordings from a short audio sample, with hymn and performer details in a mobile interface.

Personal project spanning the Flutter interface, recognition-service integration, audio-fingerprinting pipeline, metadata ingestion, and local backend setup.

Spectral analysis, peak-pair hashing, and time-aligned PostgreSQL matching. Prototype limited to indexed recordings.

Neuro Data Lab | Brain-computer interfaces

Python | PyQt | scikit-learn | EMOTIV EPOC X

A PyQt toolbox for EEG preparation and movement classification, exploring a foundation for brain-controlled interaction.

Collaborated with the capstone team on the experimental workflow and development of a PyQt toolbox for EEG preparation, Independent Component Analysis, and classifier evaluation.

Extra Trees achieved 95.45% offline evaluation accuracy; this does not establish performance on unseen participants or live game control.

DriveSafe | Computer vision & control

Python | OpenCV | dlib | Arduino | Tinkercad

Webcam-based drowsiness monitoring with timed alerts, alongside an Arduino safety-response simulation.

Contributed across detection, sensing, motor-control simulation, testing, integration, and documentation as part of a capstone team.

Used 68 facial landmarks, timed visual and audible alerts, and a separate Tinkercad control simulation with four ultrasonic sensors.

MED-e-CARE | Full-stack development

HTML | Python | SQL | UML

A pharmacy-management application connecting customer ordering, inventory administration, and an NGO ordering workflow.

Co-developed customer and administrative workflows, the NGO ordering flow, and the supporting requirements and relational-data design.

Customer accounts, medicine ordering, inventory updates, sales tracking, and NGO ordering with expiry-based availability.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, Shell scripting, Dart

Applications & data: Spring Boot, Flask, FastAPI, Flutter, React, REST APIs, Oracle Database, PostgreSQL, MySQL

Scientific computing: scikit-learn, NumPy, OpenCV, dlib, PyTorch, PyQt

Delivery & platforms: Git, Docker, Jenkins, Linux / Unix, CI/CD, Release automation, Agile

Languages: English, Punjabi, Hindi.
